Restriction of Hazardous Substances Statement

| March 16, 2006

Report No. RoHS 112305-1

| To All OSI Optoelectronics Customers

| In compliance with the European Union Directive 2002/95/EC restricting the presence of certain hazardous materials in new products entering the market, OSI Optoelectronics has determined which of our Standard Products comply with the minimum requirements of the directive.

| The attached list, effective as of March 16, 2006 identifies whether each product is compliant or whether it is not compliant. Please review the list for your specific product of interest.

Note that most products presently not in compliance with the directive are being modified to attain compliance no later than June 30, 2006 and this list will be updated on a monthly basis to keep our customers aware of the status of all Standard Products.

| Finally, it must be noted that certain Standard Products will never be compliant to the directive based on the nature of the product. Please contact your OSI Optoelectronics Sales Representative for more details on these products or for any questions you may have regarding our compliance to this directive.

Sincerely,

Sue Sutherland
