

Product & Technology

ATA2198

[Back to list](#)

- Single 5.0 volt power supply
- Low operation current
- Low EMI
- USB (ver 1.1) and PS/2 interfaces included (No additional MCU needed)
- USB/PS2 Auto-Detection Circuit
- Supports USB full speed
- 3-button application
- Selection of sensor direction (0, 90 and 270 degrees) in the mouse set
- Internal 6MHz/12MHz clock selectable (no external clock needed)
- Max moving speed: 12.75 inches/sec at 6MHz clock or 25 inches/sec at 12MHz clock
- 800dpi / 1600dpi resolution selectable
- Power conservation during no movement (No-Motion Mode)
- Optical navigation technology
- No mechanical parts
- Packaged in an optical DIP (12pin)
