

Infrared Light Emitting Diode in SMD Plastic Package

OP270 Series

- 880nm Wavelength
- Narrow Beam Angle
- High Power
- 1.9mm Water Clear Plastic Package
- Four Lead Configurations

The OP270 series are GaAlAs infrared LEDs mounted in a clear plastic SMT packages. The devices incorporate an integral molded lens which enables a narrow beam angle and provides an even emission pattern. This series is available with four lead configurations and is compatible with most automated mounting equipment. The OP270 Series LEDs are mechanically and spectrally matched to the OP570 series phototransistors.

Applications

- Non-Contact Position Sensing
- Datum detection
- Machine automation
- Optical encoders
- IrDA
- Reflective and Transmissive Sensors

SMD Infrared LED

OP270 Series

Absolute Maximum Ratings

$T_A = 25^\circ\text{C}$ unless otherwise noted

Storage Temperature Range	-40° C to +85° C
Operating Temperature Range	-40° C to +85° C
Lead Soldering Temperature	260° C ⁽¹⁾
Reverse Voltage	30 V
Continuous Forward Current	50 mA
Power Dissipation	130 mW ⁽²⁾

Notes:

- Solder time less than 5 seconds at temperature extreme.
- De-rate linearly at 2.17 mW/° C above 25° C.

Electrical Characteristics ($T_A = 25^\circ\text{C}$ unless otherwise noted)

SYMBOL	PARAMETER	MIN	TYP	MAX	UNITS	CONDITIONS
$E_{e(\text{APT})}$	Apertured Radiant Incidence	1.5			mW/cm ²	$I_F = 20\text{mA}$ ⁽³⁾
V_F	Forward Voltage			1.5	V	$I_F = 20\text{mA}$
I_R	Reverse Current			100	μA	$V_R = 2.0\text{V}$
λ_P	Peak Emission Wavelength		890		nm	$I_F = 10\text{mA}$
Θ_{HP}	Emission Angle at Half Power Points		25		Deg.	$I_F = 20\text{mA}$
t_r, t_f	Rise and Fall Time			500	ns	$I_{F(\text{PEAK})} = 100\text{mA}$, PW = 10μs, 10% D.C.

- $E_{e(\text{APT})}$ is a measurement of the apertured radiant incidence upon a sensing area 0.081" (2.06mm) in diameter, perpendicular to and centered on the mechanical axis of the lens, and 0.590" (14.99mm) from the measurement surface. $E_{e(\text{APT})}$ is not necessarily uniform within the measured area.
